

Math 10 Pre-Calc LG 9 & 10

LINEAR EQUATIONS AND GRAPHS

INTRODUCTION:

Linear equations and their graphs are very useful when seeing how things are related, and are used in almost every career. For some neat examples, check out page 338-339.

LEARNING GUIDE EXPECTATIONS:

On the completion of this learning guide you will be able to:

- 1) identify the slope and y-intercept of a straight-line graph
- 2) use slope-intercept form to graph, determine a line's equation, and solve problems
- 3) convert a linear equation to general form and use it to solve problems
- 4) use intercepts to graph a line and relate the intercepts to a situation
- 5) use slope-point form to determine a line's equation, and solve problems
- 6) identify whether two lines are parallel, perpendicular, or neither
- 7) write the equation for, and solve problems involving parallel and perpendicular lines.

EVALUATION:

You are ready to progress to the next learning guide when you can demonstrate your understanding of the above expectations. Please refer to your Math 10 Pre-Calc Marks Record Sheet to determine the assessment.

RESOURCES NEEDED:

 Mathematics 10 Text

LEARNING ACTIVITIES:

-  **Expectation 1:** identify the slope and y-intercept of a straight-line graph
- Expectation 2:** use slope-intercept form to graph, determine a line's equation, and solve problems

-  1. [Watch and take notes on instructional video on Slope/Intercept Form of a line.](#)

2. Read the purple boxes on page 341 and the Key Ideas section on page 349. In your Math Journal,
 - a) define y-intercept and use a diagram to show where we find it on a graph
 - b) state the slope-intercept form of the equation and show where the slope and y-intercept are found in that equation.

3. In the Mathematics 10 text, read Example 1 on page 343. Then do # 1 - 3 on page 349.
4. Read Example 2 on pages 344 -345. Now do #4 - 8 on page 350 -351.
5. In the Mathematics 10 text, read Example 3 (on pages 346 - 347) and Example 4 on page 348. Then do # 9, 10, 12, 13, 17, 18, 19 on pages 351 - 356.

Expectation 3: convert a linear equation to general form and use it to solve problems
Expectation 4: use intercepts to graph a line and relate the intercepts to a situation

[6. Watch and take notes on instructional video on General Form of a Line.](#)

7. Read the purple boxes on page 358 and Link the Ideas on page 359. In your Math Journal,
 - a) write the general form of the equation of a line and list the requirements for 'A'
 - b) define x-intercept and use a diagram to show where we find it on a graph.

8. In the Mathematics 10 text, read Example 1 on page 359. Then do # 1, 2 on page 365.
9. In the Mathematics 10 text, read Example 2 on page 360. Then do # 3 on page 365.
10. In the Mathematics 10 text, read Example 3 on page 361.
Then do # 4 - 8 on page 365 - 366.
11. In the Mathematics 10 text, read Example 4 on pages 362 - 363. Then do # 8, 10, 13a, 14, 19 on pages 366 - 369.

Expectation 5: Use slope-point form to determine a line's equation, and solve Problems

[12. Watch and take notes on instructional video on Slope Point Form of a Line.](#)

13. Read the Link the Ideas on page 372 and the Key Ideas on page 376.
In your Math Journal state the slope-point form of the equation of a line.

14. In the Mathematics 10 text, read Examples 1 and 2 on pages 372 -374.
Then do #1- 8, 11, 12, 14, 17 on pages 377 - 379.

- Expectation 6:** identify whether two lines are parallel, perpendicular, or neither
Expectation 7: write the equation for, and solve problems involving parallel and perpendicular lines.

15. [Watch and take notes on instructional video on Parallel and Perpendicular Lines.](#)

16. Read the Link the Ideas on page 385.
In your Math Journal,
- describe what parallel lines are, making special note of how the slopes of parallel lines are related. Draw a diagram of parallel lines clearly showing their slopes.
 - describe what perpendicular lines are, making special note of how their slopes are related. Draw a diagram of perpendicular lines clearly showing their slopes.

17. In the Mathematics 10 text, read Example 1 on page 386.
Then do #1- 5, on pages 390 -391.
18. In the Mathematics 10 text, read Examples 2 and Example 3 on pages 387 - 389.
Then do #6 – 17, 19, 20, 23, 24, 25, 26 on pages 391 -392.

REVIEW AND CHALLENGE

1. In the Mathematics 10 text, complete Chapter 7 Review questions # 1 – 17 on pages 396 – 398.
