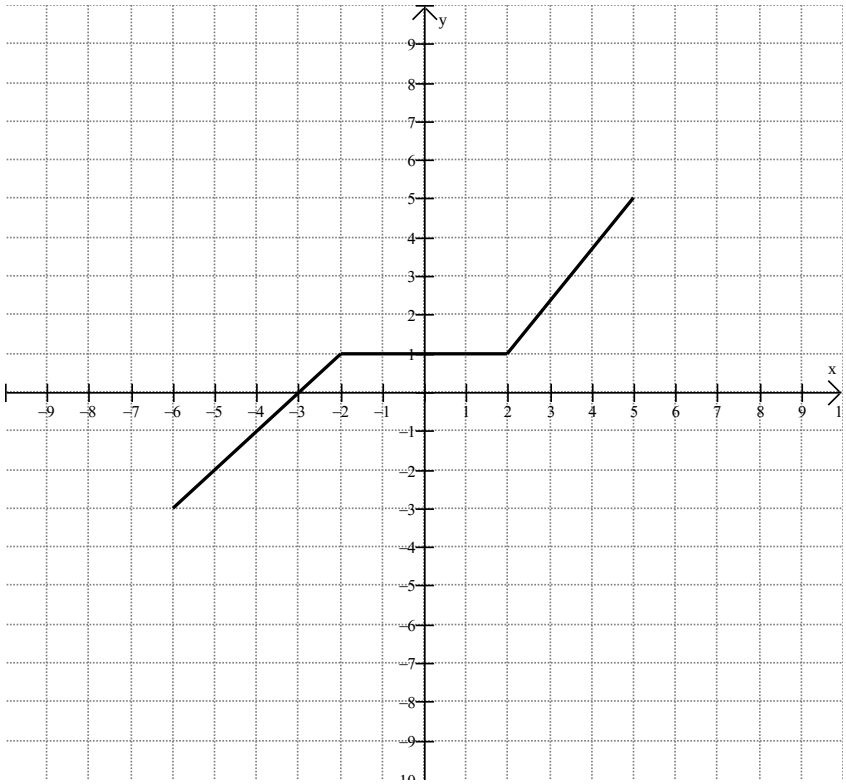
Mathematics 12 Pre-Calculus
LEARNING GUIDE 2 TEST – TRANSFORMATIONS

/30

***Full marks may NOT be given for the final answer only.**

When using a calculator, you should provide a decimal answer that is correct **to at least two decimal places** (unless otherwise indicated). Such rounding should occur **only** in the final step of the solution.

1. Using the graph of $y = f(x)$ below, sketch and label the graphs of: (2 marks)
   a) $f(2x) + 2$
   b) $-2f(x)$



2. Give the location of any invariant point(s) in the transformations you did in #1b. (1 mark)

/3

3. Describe what happens to the graph of a function if you make each change to its equation:

(2 marks each)

a) replace y with $-y$, then replace x with $x + 1$

b) replace x with $x - 2$ and y with $y - 5$.

c) replace x with $\frac{1}{2}x$ and y with $3y$.

d) replace x with $-2x$ and y with $\frac{1}{3}y$, then y with y + 1

4. Describe what happens to the equation of a function if you make each change to its graph:

(2 marks each)

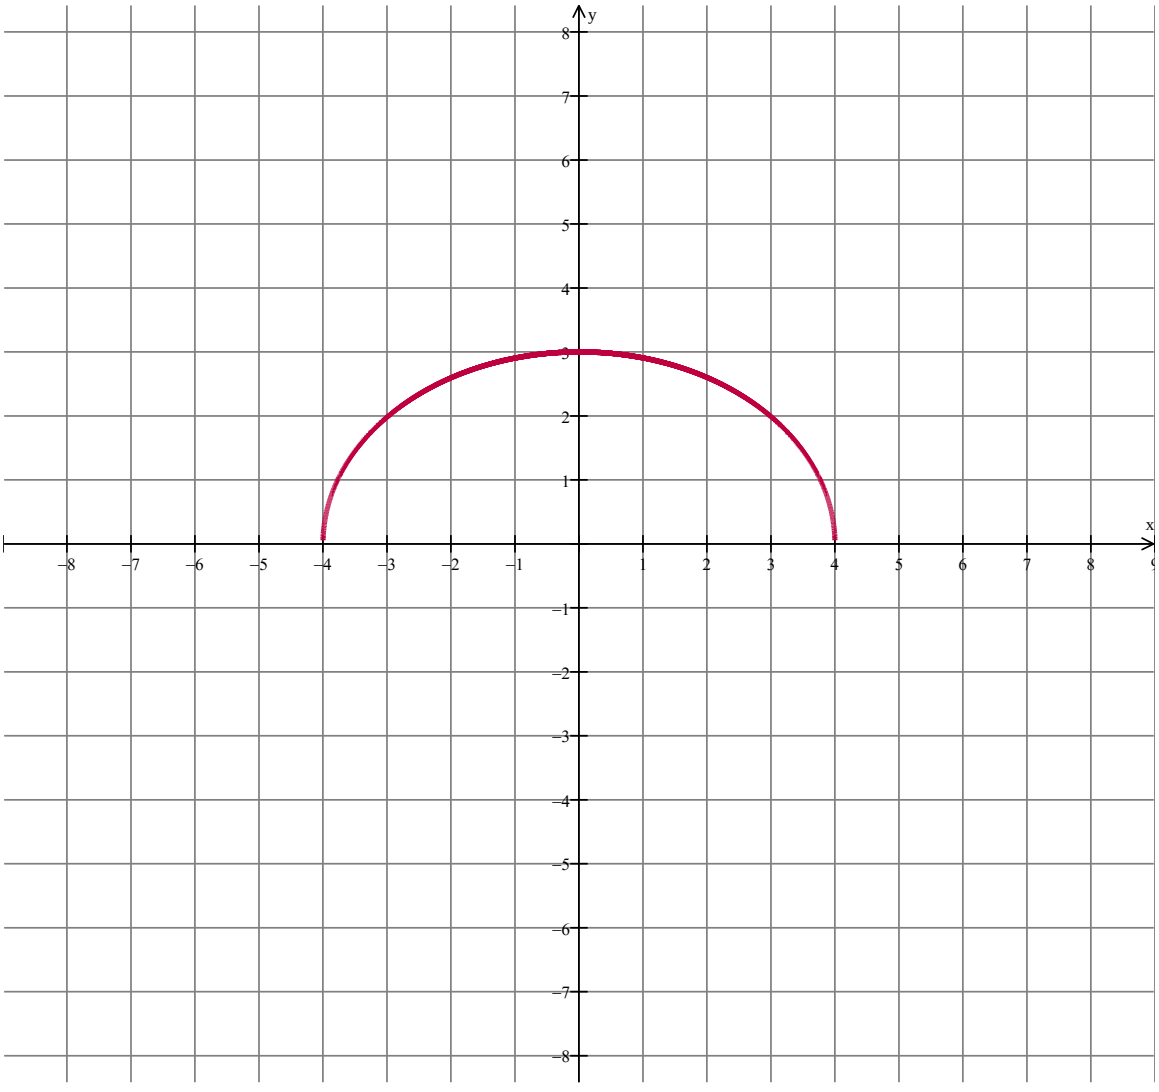
a) reflect the graph about the line $y = x$.

b) stretch (expand) horizontally by a factor of 3 and vertically by a factor of 4.

/12

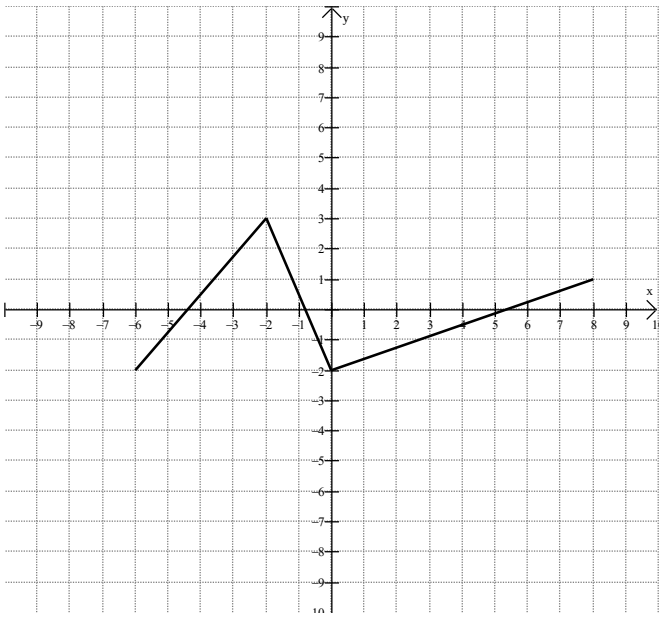
c) stretch (compress) vertically by a factor of $\frac{1}{5}$ and translate 2 units up.

5. Given the graph of $y = f(x)$, sketch the graph of $y = -2f(x-1) + 3$. (2 marks)



/4

6. a) Given the graph of *f*(*x*) below, sketch and label the graph of $y = f^{-1}(x)$. (3 marks)



b) How can you tell by looking at the graph of $f(x)$ that the inverse will not be a function? (1 mark)

c) How could you restrict the domain of $f(x)$ so that the inverse would be a function? (1 mark)

/5

7. What is the inverse of the relation $y = (x+1)^3$? (2 marks)

8. If (2, -1) is a point on the graph of $y = f(x)$, what must be a point on the graph of $y = -f(2(x + 2)) - 3$? (2 marks)

9. Give the equation of the new relation if the graph of $y = x^2 - x + 1$ were stretched (expanded) vertically by a factor of 2, stretched (compressed) horizontal by a factor of $\frac{1}{3}$, reflected in the y axis, and moved down 1. (2 marks)
