

Graduation Numeracy Assessment

2017 SAMPLE ASSESSMENT

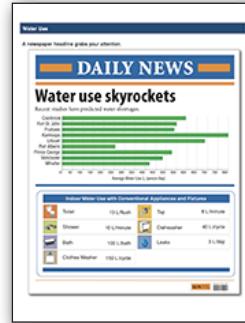

Common Component

Questions on computer,
responses completed on computer

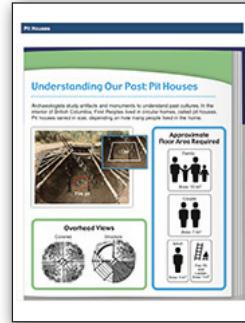

In this part you will:

- read two tasks
- complete 6 questions
for each task

A. Which of the following communities uses an average between 200 and 400 litres/household per day?

Whiteman
 Warrnambool
 Port Neches
 Prince George

B. You want to estimate the number of people who might have lived in a pit house. Which of the following is required to determine the floor area needed?

Water height
 pit house height
 area required for living space
 dimensions of the top opening

B. What expression could you use to estimate how many people lived in a pit house with a diameter of 8 m?

$\pi \times 8^2 \div 4$
 $4 \times 8 \div 4$
 $\pi \times 8^2$
 $\pi \times 8^2 \div 4$

B. Which strategies could you use to estimate how many people lived in 12 pit houses of similar size?

Estimate the number of people who live in 1 pit house and divide by 12.
 Estimate the number of people who live in 1 pit house and multiply by 12.
 Estimate the total area of 12 pit houses and divide by the area required for 1 person.

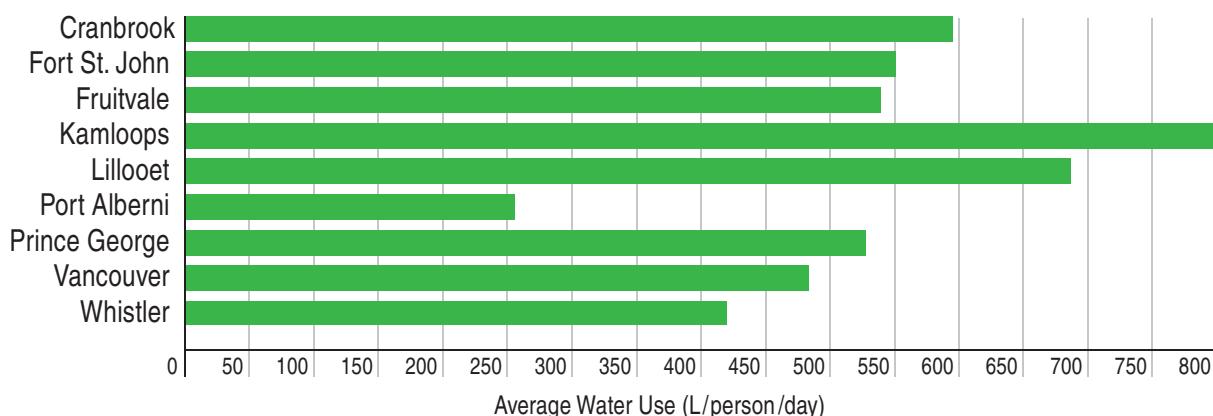

Water Use

A newspaper headline grabs your attention.

DAILY NEWS

Water use skyrockets

Recent studies have predicted water shortages.

Indoor Water Use with Conventional Appliances and Fixtures

	Toilet	13 L/flush		Tap	8 L/minute
	Shower	10 L/minute		Dishwasher	40 L/cycle
	Bath	100 L/bath		Leaks	3 L/day
	Clothes Washer	150 L/cycle			

1. Which of the following communities uses on average between 250 and 450 L/person/day of water?

Select all that apply.

- Whistler
- Vancouver
- Port Alberni
- Prince George

2. Which representation of a family's weekly water use best illustrates where and how water could be saved?

3. A family of four wants to calculate each family member's daily water use from the appliances they share (dishwasher and clothes washer). The family does 6 dishwasher loads and 5 clothes washer loads each week.

Select one expression they could use to do this calculation.

represents the amount of water used per dishwasher load.

represents the amount of water used per clothes washer load.

$$\frac{6 \text{ [dishwasher icon]} + 5 \text{ [clothes washer icon]}}{4}$$

$$\frac{6 \text{ [dishwasher icon]} + 5 \text{ [clothes washer icon]}}{7}$$

$$\frac{6 \text{ [dishwasher icon]} + 5 \text{ [clothes washer icon]}}{4} \div 7$$

$$\frac{6 \text{ [dishwasher icon]} + 5 \text{ [clothes washer icon]}}{7} \div 4$$

$$\frac{(6 + 5) (\text{[dishwasher icon]} + \text{[clothes washer icon]})}{4} \div 7$$

$$\frac{(6 + 5) (\text{[dishwasher icon]} + \text{[clothes washer icon]})}{7} \div 4$$

4. You calculate the average shower length to be 11 minutes and 15 seconds.

If everyone in a family of 5 showers daily, how much water would the family use for showering each week?

Answer to the nearest litre.

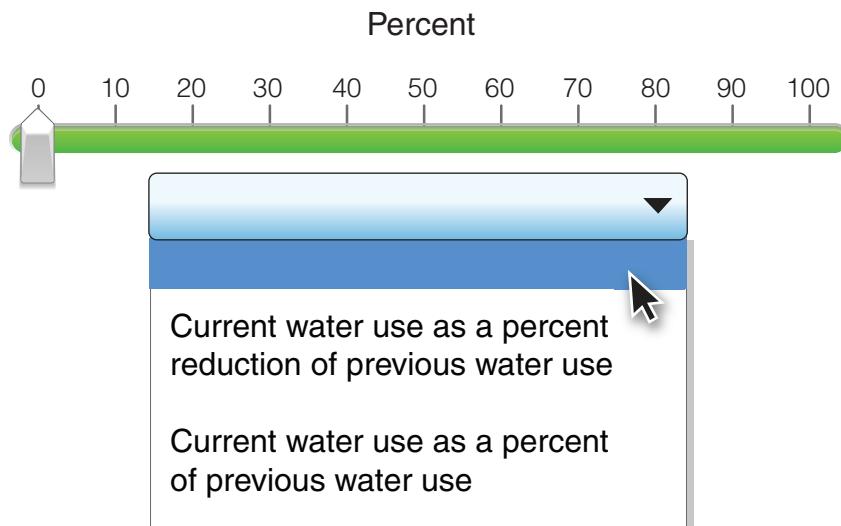

L

5. A friend has worked to reduce their bathroom water use. You compare their current bathroom water use to their previous bathroom water use.

	Previous Bathroom Water Use (L/day)	Current Bathroom Water Use (L/day)
Toilet	65	52
Tap	48	32
Shower	110	80

What can you say about their current bathroom water use compared to their previous bathroom water use?

Select your answer by using the drop-down menu to label the graph **and** by dragging the point to the correct location on the graph.

6. A family of four decides to challenge themselves to use less water. For 1 week, they record their water use.

	Water Use	Total Water Use (L)
 Toilet	4 flushes/person/day	1456
 Tap	5 min/person/day	1120
 Shower	8 min/person/day	2240
 Dishwasher	7 loads/week	280
 Clothes washer	4 loads/week	600
 Leaks	3 L/day	21
TOTAL		5717

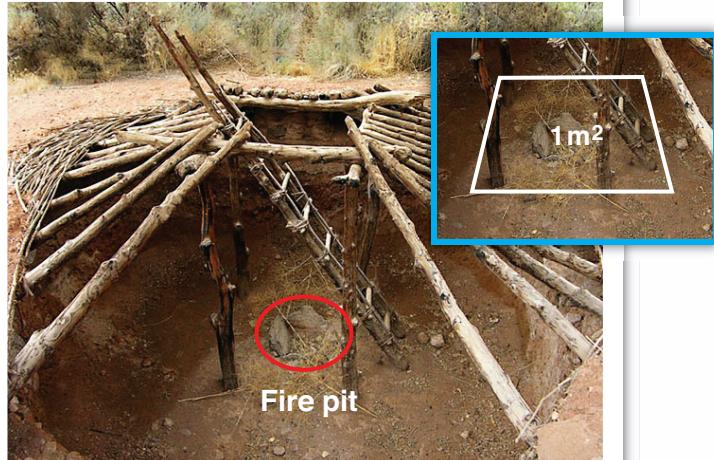

The family has decided on some strategies to reduce their total water use.
Which strategies are **unreasonable**?

Select all that apply.

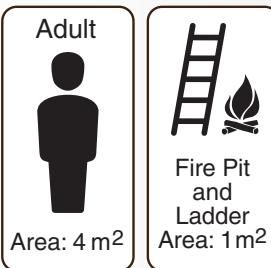

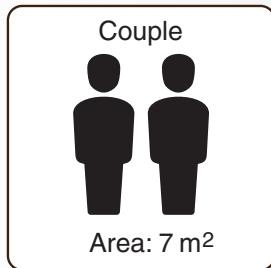

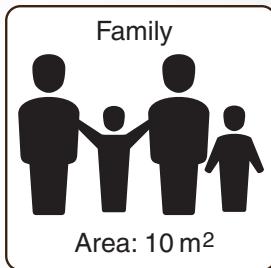

- Parent 1 strategy: Fix leaks
- Parent 1 strategy: Use the clothes washer 1 time/week
- Parent 2 strategy: Reduce tap use by $\frac{1}{4}$
- Sibling 1 strategy: Reduce shower time by $\frac{1}{3}$
- Sibling 1 strategy: Pack the dishwasher more efficiently and run 5 loads/week
- Sibling 2 strategy: Wash and rinse dishes by hand instead of using the dishwasher

Understanding Our Past: Pit Houses

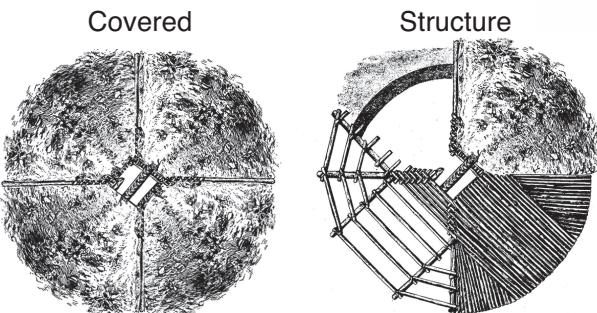

Archaeologists study artifacts and monuments to understand past cultures. In the interior of British Columbia, First Peoples lived in circular homes, called pit houses. Pit houses varied in size, depending on how many people lived in the home.

Approximate Floor Area Required

Overhead Views

7. You want to estimate the number of people who might have lived in a pit house.

Which of the following is required to determine the floor area needed?

- ladder length
- pit house height
- area required for living space
- dimensions of the top opening

8. Which expression could you use to estimate how many adults lived in a pit house with a diameter of 9 m?

$\pi\left(\frac{9}{2}\right)^2 \times 4$

$\pi(9)^2 \times 4$

$\frac{\pi\left(\frac{9}{2}\right)^2}{4}$

$\frac{\pi(9)^2}{4}$

9. Which strategies could you use to estimate how many people lived in 12 pit houses of similar size?

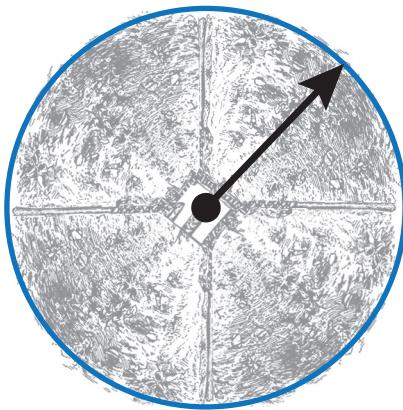

Select all that apply.

- Estimate the number of people who lived in 1 pit house and divide by 12.
- Estimate the number of people who lived in 1 pit house and multiply by 12.
- Estimate the total area of 12 pit houses and divide by the area required for 1 person.
- Estimate the total area of 12 pit houses and multiply by the area required for 1 person.

10. What radius is required for a pit house with 3 families and 2 couples?

Drag the point to show the required radius for the floor area of the pit house.

Answer to the nearest metre.

11. You estimate that approximately 10 adults lived in a pit house with a diameter of 8 m.

Using this estimate, how many adults might have lived in a pit house with a diameter of 12 m?

adults

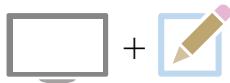

12. An archeologist calculated how many people lived in a pit house with a floor area of 63 m^2 . He divided 63 m^2 by 4 and said 15.75 people. This is incorrect.

What mistakes did the archeologist make?

Select all that apply.

- diameter of pit house not used
- number of people not rounded
- age of occupants not considered
- gender of occupants not considered
- assumed only single adults lived there
- fire pit and ladder space not considered

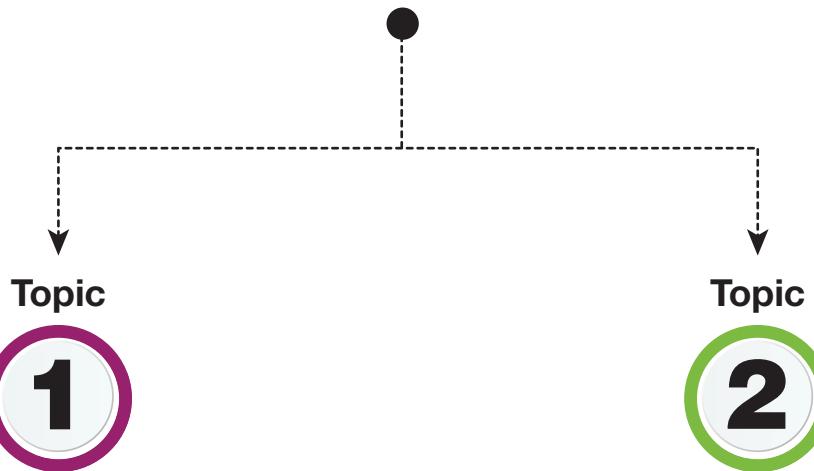

Student-Choice Component

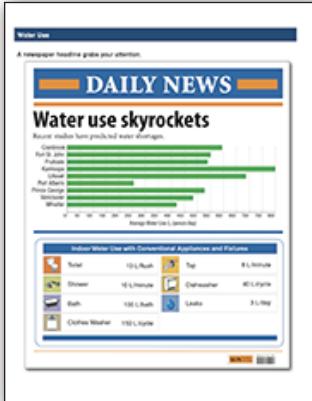

Questions on computer,
responses completed on paper response sheet

Choose the numeracy task for which you would like to complete an extensive constructed response question. These questions are a logical progression from where the tasks are headed.

Think carefully; once you make your choice you must complete this question.

Water Use

Pit Houses

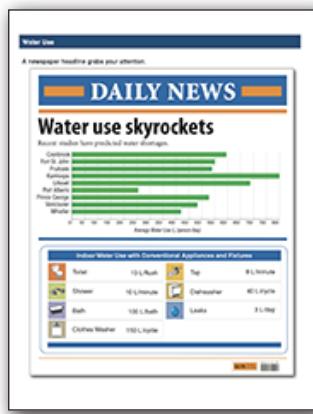

You have chosen:

Water Use

GO BACK

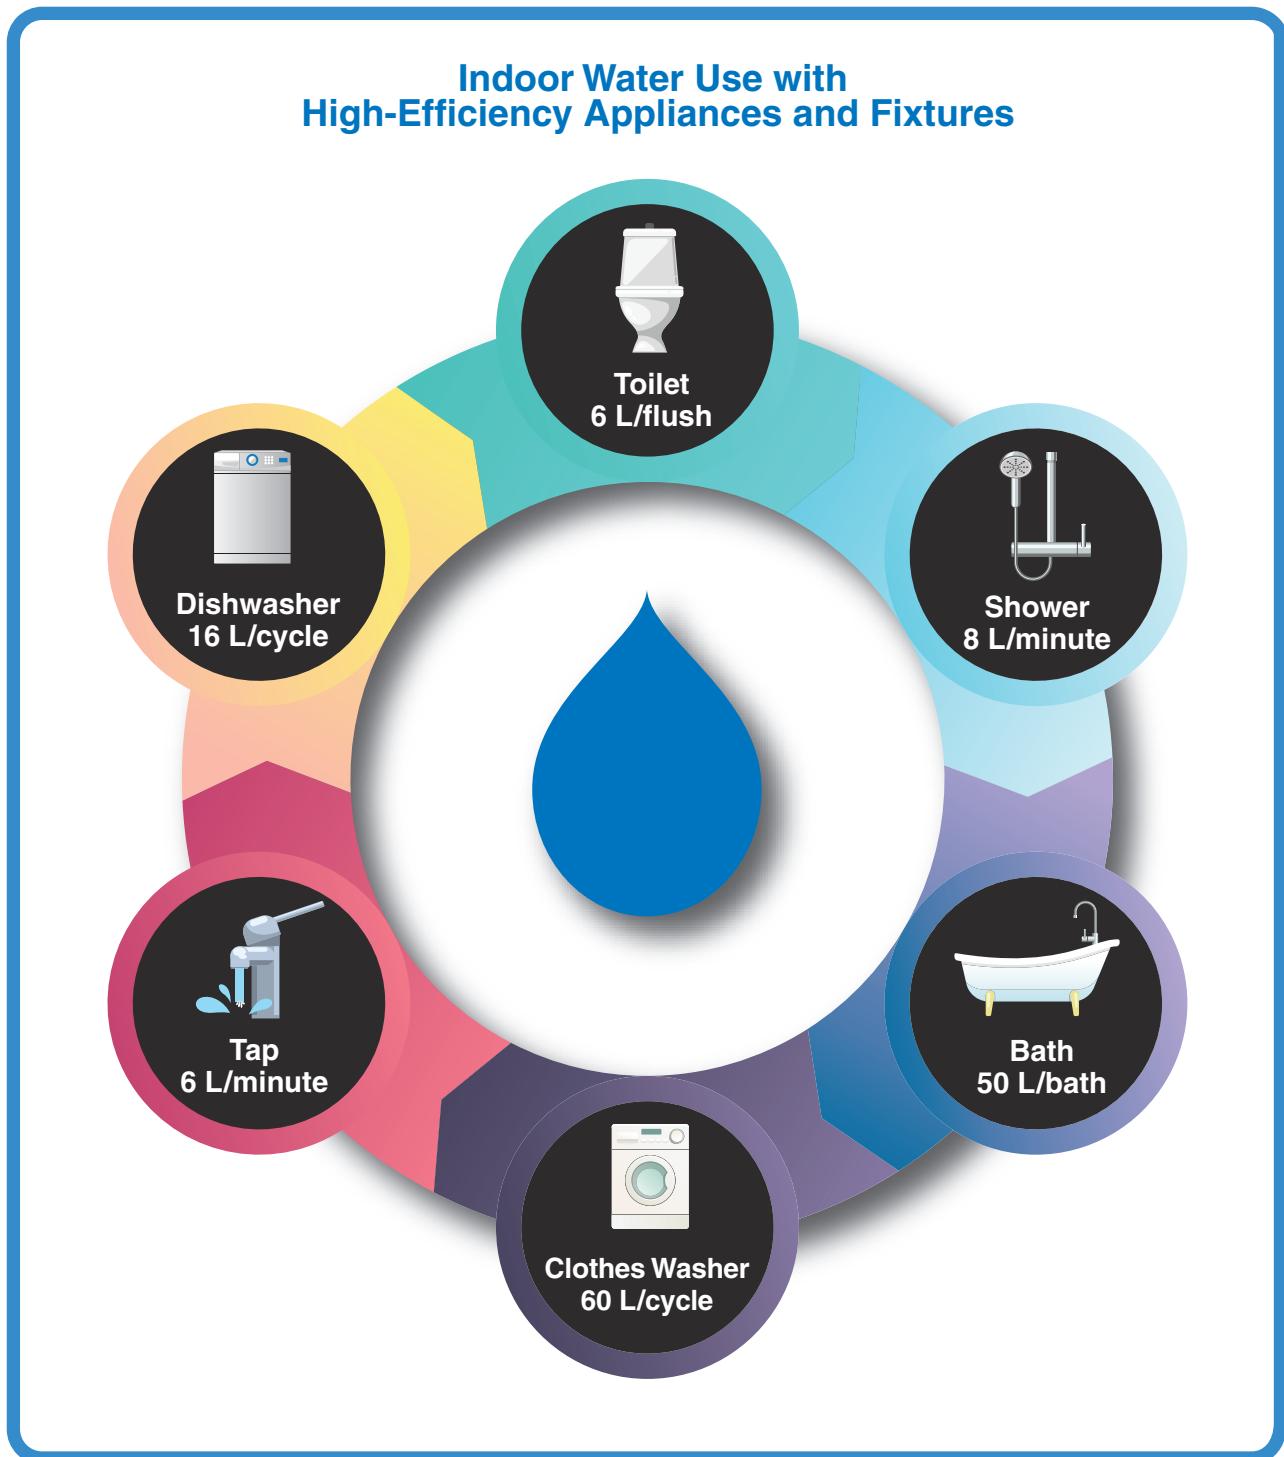

1

CONTINUE TO ASSESSMENT

Water Use

High-efficiency appliances and fixtures can help reduce the amount of water we use.

13. You want to reduce your personal water use to 1050 L/week. You install high-efficiency appliances and fixtures, and change your water-use habits.

Plan a water budget for yourself for 1 week that meets this goal using the high-efficiency appliances and fixtures.

Explain and justify your solution.

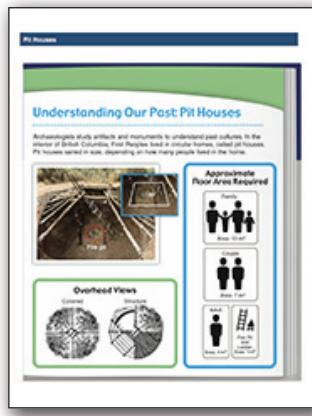

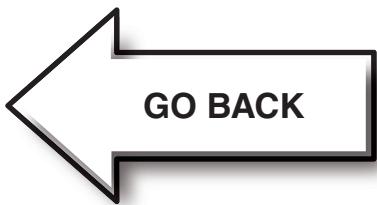

You must use everything in the table below at least once in the week.

High-Efficiency Appliances and Fixtures	
	Shower and/or bath
	Toilet
	Tap
	Dishwasher
	Clothes Washer

This question is to be answered on paper.

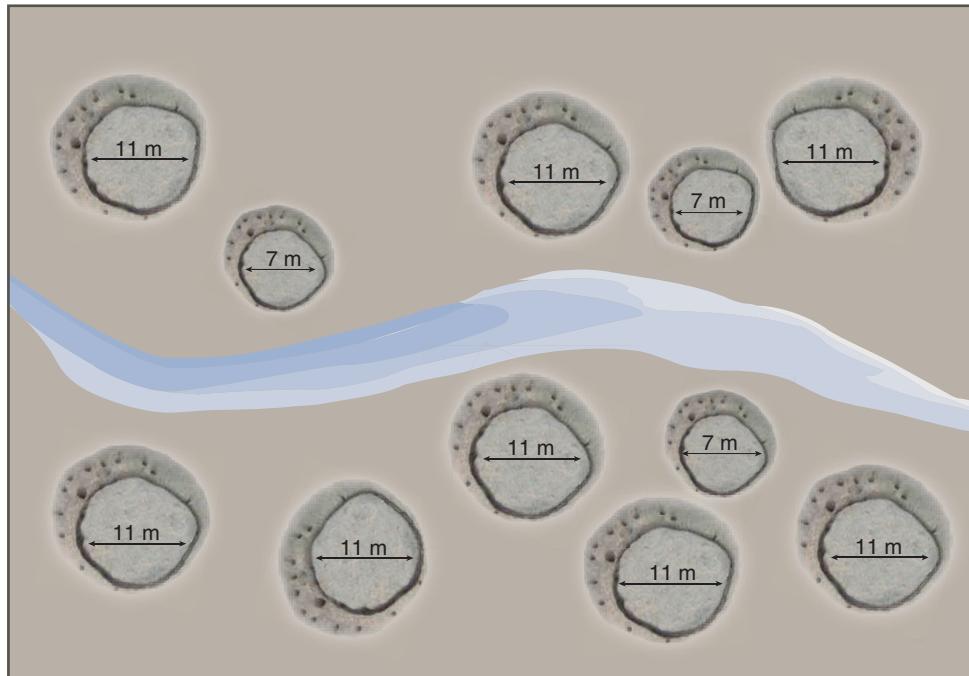

You have chosen:

Pit Houses

Pit Houses

13. Archaeologists examine the remains of a village of pit houses. Impressions of where the pit houses were located are still visible. The diagram below shows the remains of a village with a number of pit houses.

Estimate the number of people that could have lived in this village. State any assumptions made.

Explain and justify your solution.

This question is to be answered on paper.

In this part you will:

- read two tasks
- complete 6 questions
for each task

Video Game Company

Five years ago, Joe Eat and Ted started a company together. They each contributed a different amount of money to start the company.

CONTRACT

The company generates its primary revenue from Joe Eat Park and Ted's Arcade. Both have been the founders along with their wives, Linda Eat and Linda Arc, who are Vice Presidents of Sales and Marketing. Both are shareholders in the company.

Forster for Joe Eat Park contributes to profit a $\$1000$ and Ted's Arcade contributes $\$1000$ towards the cost of the game.

Forster for Ted's Arcade contributes to profit a $\$1000$ and Linda Eat contributes $\$1000$ towards the cost of the game.

Both are shareholders in the company and are co-owners of the assets of the company in an entity.

[Handwritten signatures of Joe Eat and Ted over the contract.]

The Company created several popular video games. Now Joe Eat and Ted receive an offer from an individual who wants to buy their company.

14. What information do you need to determine who has contributed the most to the company?

Note and that says:

Number of employees hired
 profit earned for each video game sold
 original value of the computer equipment
 number of hours worked by the staff
 number of video games the company produced
 number of months the company was in business

15. Joe Eat has contributed \$8000 to his Company. Ted wants to calculate the total contribution made to the Company after 5 years.
When is the following expression could he use?

$20 \text{ days} \times 1000 \times 12 \times 5$
 $20 \text{ days} \times 1000 \times 12 \times 6$
 $20 \text{ days} \times 12 \times 1000 \times 5$
 $20 \text{ days} \times 12 \times 1000 \times 6$

16. Jim Eat has contributed \$8000 to his Company. Ted wants to calculate the total contribution made to the Company after 5 years.

When is the following expression could he use?

$20 \text{ days} \times 1000 \times 12 \times 5$
 $20 \text{ days} \times 1000 \times 12 \times 6$
 $20 \text{ days} \times 12 \times 1000 \times 5$
 $20 \text{ days} \times 12 \times 1000 \times 6$

Forest Fire

You are being tested in managing forest fires. Your Fire Fighting Training Manual describes a fire to be tested situations.

NORTH REGION
Fire Fighting Training Manual
Forest Fire: How They Spread

The map below is one of the first. It shows a fire starting in cell 1,1. The fire may spread from one cell into an adjacent cell if the adjacent cell is also on fire. Cells marked with a dot are not on fire.

Map:

1	1	0	1	1
2	1	0	1	0
1	1	0	0	2
0	1	1	0	1
1	1	0	1	1

Legend:

- Red square = burning cell
- Yellow square = spreading cell

Each cell has the following fire spread ability, affecting the immediate fire it is adjacent to and cut from a neighboring cell:

Fire Spread Ability	Probability of Spreading
C	Fire has a 0% chance of spreading into a non-spreading cell
I	Fire has a 50% chance of spreading into a non-spreading cell
S	Fire has a 100% chance of spreading into a non-spreading cell
B	Fire has a 100% chance of spreading into a spreading cell

17. If the highlighted cell is burning, which is the last of the cell that has a fire spread rating of 2?

Legend:

- Red square = burning cell
- Yellow square = spreading cell

Each cell has the following fire spread ability, affecting the immediate fire it is adjacent to and cut from a neighboring cell:

Fire Spread Ability	Probability of Spreading
C	Fire has a 0% chance of spreading into a non-spreading cell
I	Fire has a 50% chance of spreading into a non-spreading cell
S	Fire has a 100% chance of spreading into a non-spreading cell
B	Fire has a 100% chance of spreading into a spreading cell

Five years ago, Jae Eun and Ted, started a company together. They each contributed a different amount of money to start the company.

The Company created several popular video games. Now Jae Eun and Ted receive an offer from an individual who wants to buy their company.

14. What information do you need to determine who has contributed the most to the company at any point in time?

Select all that apply.

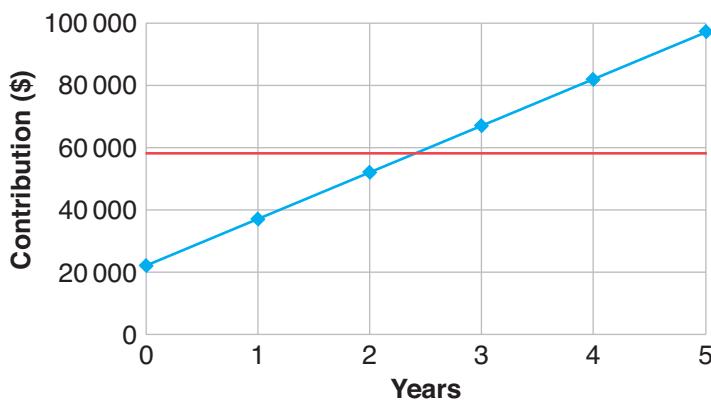

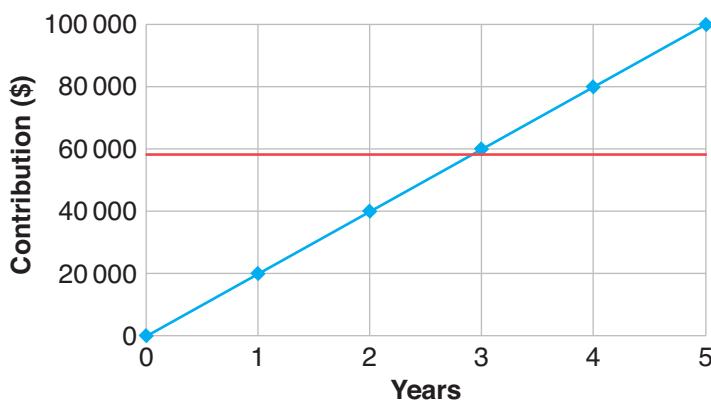

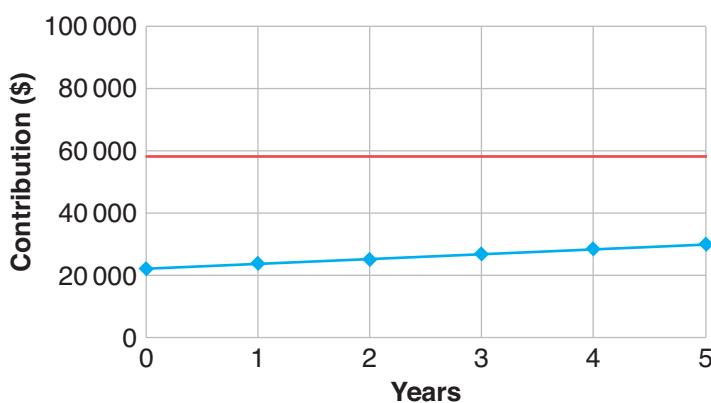

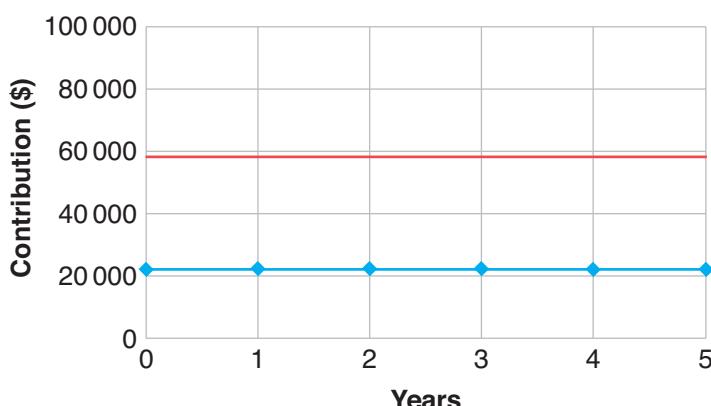

- number of employees hired
- profit earned from each video game sold
- original value of the computer equipment
- amount each founder contributed at the start
- number of video games the company produced
- number of months the company was in business

15. Jae Eun has contributed \$58 500 to The Company. Ted wants to calculate his total contribution to The Company after 5 years.

Which of the following expressions could he use?

- $22\ 000 + 1250 \div 12 \times 5$
- $22\ 000 + 1250 \times 12 \times 5$
- $22\ 000 \times 12 \times 1250 \times 5$
- $22\ 000 \times 12 \div 1250 \times 5$

16. Select the graph that shows both Jae Eun and Ted's individual contributions to The Company over the first 5 years.

17. Jae Eun contributed more than Ted towards The Company's start-up costs (including the computer equipment).

How much time after the start of The Company until Ted's contribution is equal to Jae Eun's contribution?

Answer to the nearest month.

year(s) and

month(s)

18. One year after Jae Eun and Ted started their company, they agree to add the following to their contract.

ADDENDUM

The portion of The Company owned by each of The Founders is based on the total amount of money (includes the value of the computer equipment) each has contributed up to that point in time.

After 5 years, what portion of The Company does Ted own?

Answer to the nearest percent.

%

19. Five years after Jae Eun and Ted started their company, they receive two offers for their company.

OFFER 1

Sale price: \$200 000

The Founders will continue to run The Company for 5 more years and will each receive a salary of \$60 000 per year.

OFFER 2

Sale price: \$600 000

Jae Eun wants to accept Offer 1 and Ted wants to accept Offer 2.

Drag and drop the outcome for each of their choices.

**Jae Eun
Offer 1**

**Ted
Offer 2**

lower immediate sale price
and lower overall value

lower immediate sale price
but higher overall value

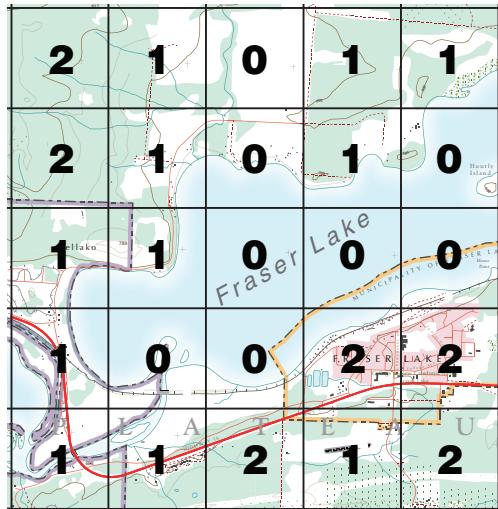

higher immediate sale price
but lower overall value

higher immediate sale price
and higher overall value

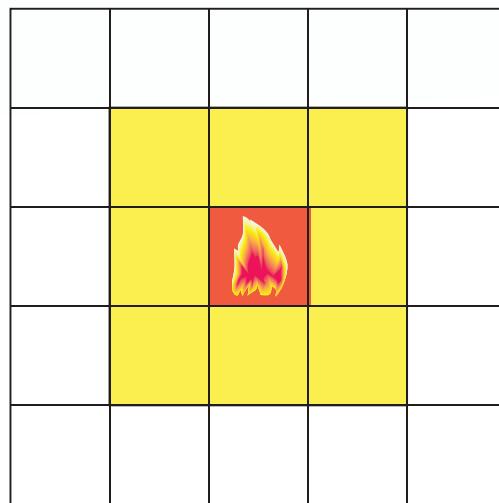

You are being trained in managing forest fires. Your Fire Fighting Training Manual describes a forest fire spread simulation.

The map below is a fire grid. It describes the likelihood of a fire spreading to different cells.

Fire may spread from one cell into neighbouring cells as shown:

Burning cell Neighbouring cell

Each cell has the following fire-spread rating reflecting the probability that fire will spread to that cell from a neighbouring cell:

Fire-Spread Rating	Probability of Spreading
0	Fire has a 0% chance of spreading into it from neighbouring cells
1	Fire has a 50% chance, or probability of 0.5, of spreading into it from neighbouring cells
2	Fire has an 80% chance, or probability of 0.8, of spreading into it from neighbouring cells

Example: At time zero, the forest in the highlighted cell (🔥) is burning. There are many possible ways that the fire can spread. Two possible scenarios are shown below.

1	1	1	2
1	🔥	1	1
0	1	2	0
1	1	1	1

Scenario 1

3 neighbouring cells are burning.

1	1	1	2
1	🔥	1	1
0	1	2	0
1	1	1	1

5 more neighbouring cells are burning.

1	1	1	2
1	🔥	1	1
0		1	0
1	1	1	1

Scenario 2

5 neighbouring cells are burning.

1	1	1	2
1	🔥	1	1
0	1	2	0
1	1	1	1

5 more neighbouring cells are burning.

1			2
1	🔥		1
0	1		0
1	1	1	1

20. If the highlighted cell is burning, which is true of the cell that has a fire-spread rating of 2?

1	1	1	1
1	0	1	1
1	1	🔥	2
0	1	1	1

- Fire has a 0% chance of spreading into the cell.
- Fire has a 100% chance of spreading into the cell.
- Fire has a two out of five chance of spreading into that cell.
- Fire has a four out of five chance of spreading into that cell.

21. The environment has an effect on how quickly a fire spreads. Put the following landscapes in order from lowest-to-highest fire-spread rating.

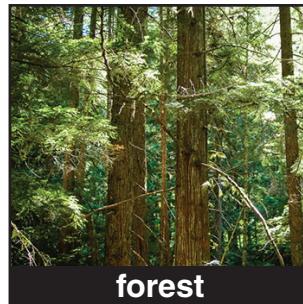

--	--	--	--	--

**Low fire-spread
rating (0)**

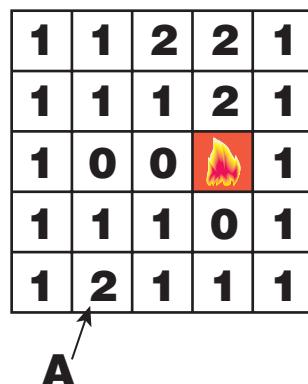

**High fire-spread
rating (2)**

22. At time zero, the highlighted cell is burning.

Create an equation to calculate the probability that a fire will spread to cell A after 4 hours.

Drag and drop the operations and probabilities into the boxes below.

—	+	×	÷
---	---	---	---

0	0.5	0.8	1
---	-----	-----	---

Probability =

--	--	--

23. At time zero, the highlighted cell is burning.

1	1	2	2	1
1	1	1	2	1
1	0	0		1
1	1	1	0	1
1	2	1	1	1

Select the cells that will be burning after 2 hours in the worst-case scenario.

1	1	2	2	1
1	1	1	2	1
1	0	0		1
1	1	1	0	1
1	2	1	1	1

24. After 4 hours, the highlighted cells are burning.

1	1	2	2	1	1	1	1
1	0	0	1	1	1	1	1
1	1	1	1	1	1	1	0
0	1	1	1	1	1	0	1
1	1	1	1	2	2	1	1
1	1	1	2	1	2	2	1
2	1	1	1	1	0	1	1
2	1	1	1	1	1	0	1

In which cell did the fire start?

1	1	2	2	1	1	1	1
1	0	0	1	1	1	1	1
1	1	1	1	1	1	0	1
0	1	1	1	1	1	0	1
1	1	1	A	B	2	1	1
1	1	1	C	D	2	2	1
2	1	1	1	1	0	1	1
2	1	1	1	1	1	0	1

- Cell A
- Cell B
- Cell C
- Cell D

25. At time zero, the highlighted cell is burning.

1	2	2	1	2	1	0	1
1	1	1	1	1	2	1	1
1	1		1	1	1	1	2
2	1	1	2	2	1	1	1
2	1	1	2	1	1	1	1
0	1	1	1	1	1	1	1
0	1	1	0	1	2	2	2
0	0	2	1	1	2	2	2

Which of the following shows a possible fire-spread pattern after 6 hours?

1	2	2	1	2	1	0	1
1	1	1	1	1	2	1	1
1	1		1	1	1	1	2
2	1	1	2	2	1	1	1
2	1	1	2	1	1	1	1
0	1	1	1	1	1	1	1
0	1	1	0	1	2	2	2
0	0	2	1	1	2	2	2

1	2	2	1	2	1	0	1
1	1	1	1	1	2	1	1
1	1		1	1	1	1	2
2	1	1	2	2	1	1	1
2	1	1	2	1	1	1	1
0	1	1	1	1	1	1	1
0	1	1	0	1	2	2	2
0	0	2	1	1	2	2	2

1	2	2	1	2	1	0	1
1	1	1	1	1	2	1	1
1	0		1	1	1	1	2
2	0	1	2	2	1	1	1
2	1	1	2	1	1	1	1
0	1	1	1	1	1	1	1
0	1	1	0	1	2	2	2
0	0	2	1	1	2	2	2

1	2	2	1	2	1	0	1
1	1	1	1	1	2	1	1
1	1		1	1	1	1	2
2	1	1	2	2	1	1	1
2	1	1	2	1	1	1	1
0	1	1	1	1	1	1	1
0	1	1	0	1	2	2	2
0	0	2	1	1	2	2	2

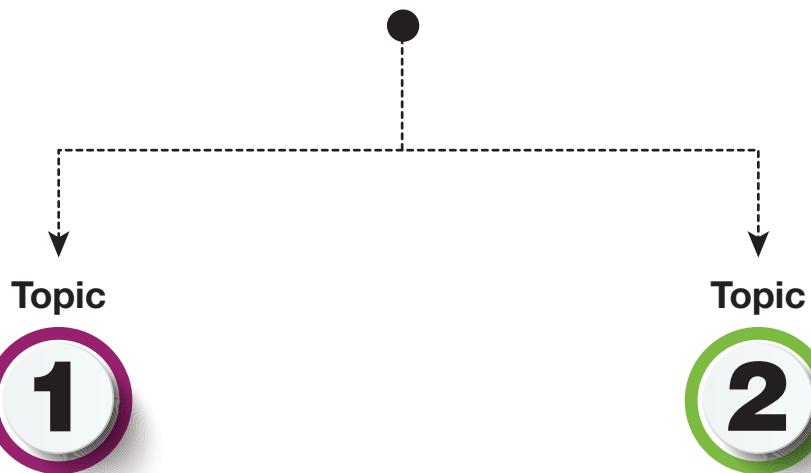

Student-Choice Component

Choose the numeracy task for which you would like to complete an extensive constructed response question. These questions are a logical progression from where the tasks are headed.

Think carefully; once you make your choice you must complete this question.

Video Game Company

Video Game Company

Five years ago, Joe Sut and Ted, started a company together. They each contributed a different amount of money to start the company.

CONTRACT

This contract governs the partnership between ... Joe Sut (Joe), ... and ... Ted (Ted). ... (both known as the "Partners" along together as "The Joe Sut & Ted's Video Game Adventure", "Adventure", "Company" or "Business".)

The Company shall create video games.

Founder Ted Brown commits to contribute computer equipment valued at \$1000 and the maintenance for the start-up costs.

Founder Ted Brown commits to contribute \$25,000 towards the start-up costs. He will also pay \$10.00 per month for The Company's office space.

By signing below, each Founder indicates acceptance of the terms of this contract in its entirety.

[Signatures]

The Company created several popular video games. Now Joe Sut and Ted receive an offer from an individual who wants to buy their company.

Forest Fires

Forest Fire

You are being trained in managing forest fires. Your Fire Fighting Training Manual describes a forest fire spread simulation.

NORTH REGION Fire Fighting Training Manual Forest Fire: How They Spread

The map below is a fire grid. It describes the likelihood of a fire spreading to a neighbouring cell.

Legend:

- Black cell = burning cell
- White cell = unburned cell
- Yellow cell = beginning cell

Each cell has the following probability of spreading along with the probability that the cell will not burn at all:

Fire Spreading Rating	Probability of Spreading	Probability of Remaining Unburned
0	0%	100%
1	10%	90%
2	20%	80%

For example, if a cell has a 10% chance of spreading into 4 other neighbouring cells, it has a 90% chance of remaining unburned.

You have chosen:

Video Game Company

Video Game Company

26. Five years after the start of The Company, The Founders decide to sell it for \$750 000. To determine their fair share of the sale price, they agree that any contributions made towards start-up costs will be worth 1.5 times their original value. Contributions made after start-up will not be adjusted.

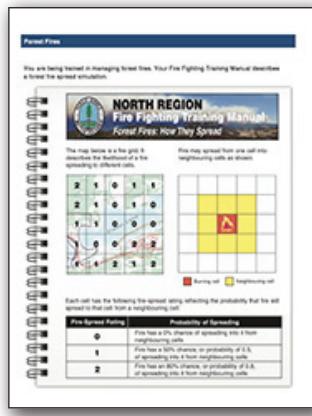

How much should Jae Eun and Ted each receive from the sale of their company?

Explain and justify your solution.

This question is to be answered on paper.

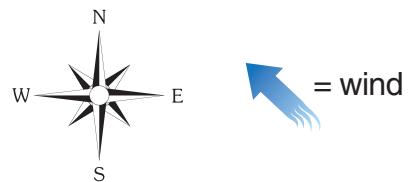

You have chosen:

Forest Fires

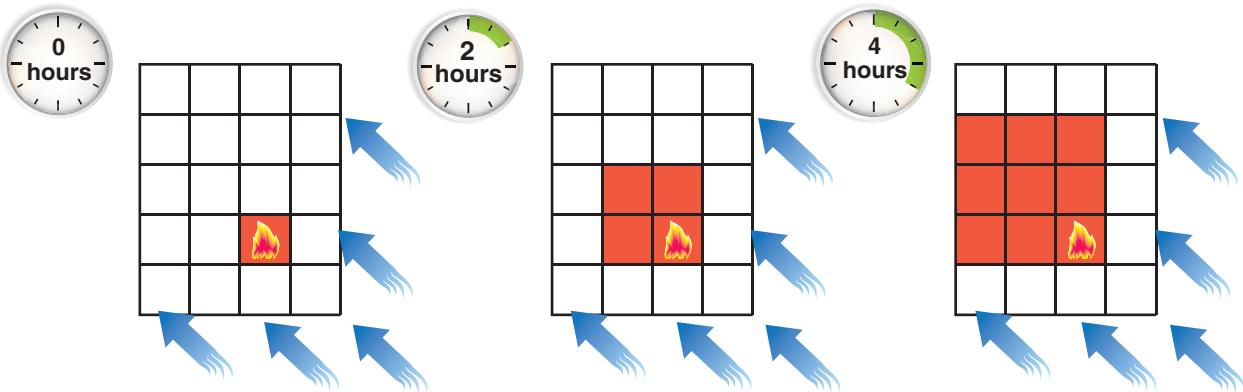

Forest Fires

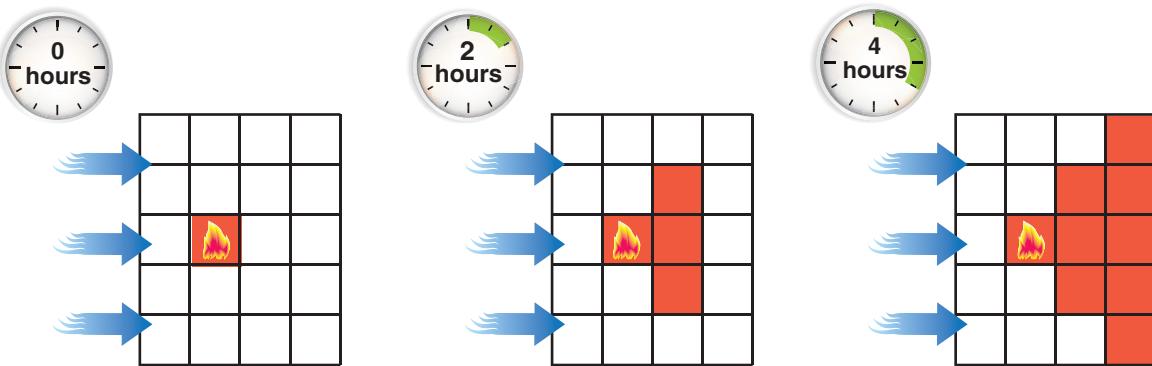

Strong wind conditions can affect the spread of fire into neighbouring cells.

Wind from the south-east

Wind from the west

Wind **increases** the probability of fire spreading into neighbouring cells which are **downwind**, and wind **decreases** the probability of fire spreading into neighbouring cells which are **upwind**:

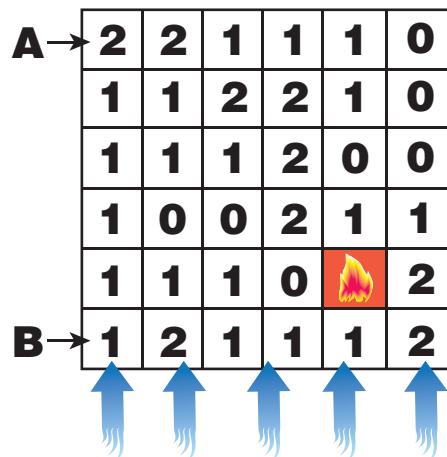

Fire-Spread Rating	Probability of Fire-Spreading		
	Neighbouring (no wind)	Downwind Neighbouring	Upwind Neighbouring
0	0	0	0
1	0.5	0.8	0.2
2	0.8	1.0	0.3

26. At time zero, the highlighted cell is burning and there is a strong, constant wind blowing from the south. There are people living in the areas within cell A and cell B.

What is the minimum time it would take the fire to reach cells A and B?

What is the likelihood of the fire spreading to cells A and B within that time?

Explain and justify your solution.

This question is to be answered on paper.

Self-Reflection Component

Questions on computer,
responses completed on computer

In this part you will:

- complete 4 questions

The screenshot shows a page titled "Graduation Numeracy Assessment Self-Reflection". It contains four numbered sections with multiple-choice questions and a rating scale at the bottom.

1. Before you start the assessment, think about what you will need.
Select all that apply.
 I will use a calculator.
 I will use a pencil and paper.
 I will use a ruler.
 I will use a protractor.
 I will use a compass.
 I will use a scientific calculator.
While answering, I will ask for help when needed.

2. Before you start the assessment, think about what you will need.
Select all that apply.
 I will use a calculator.
 I will use a pencil and paper.
 I will use a ruler.
 I will use a protractor.
 I will use a compass.
I will use a scientific calculator.
While answering, I will ask for help when needed.

3. The assessment allows me to demonstrate my ability to numerically:
← →

4. Order the four tasks from easiest to most challenging:
1.
2.
3.
4.

Self-Reflection

1. Reflect on your preparation for this assessment.

Select all the strategies that you used to prepare.

- I did the sample assessment.
- I watched the numeracy video(s).
- I reviewed the student sample responses online.
- I kept up with schoolwork.
- I prepared ahead of time with friends and teachers.
- While preparing, I asked for help when needed.

2. Reflect on your work on this assessment. Think about what you did well.

Select all that apply.

- I read each question carefully.
- I reviewed my answers before I submitted my assessment.
- I worked out responses on paper and checked my work.
- In the student-choice component, I thought carefully about my choice.

3. This assessment allowed me to demonstrate my ability in numeracy.

4. Order the four tasks from most interesting to least interesting.
